

# Restaurant and Food Industry Best Management Practices for Stormwater

1. Recycle grease and oil. Always keep grease bin lids closed! Immediately dry clean-up spills from transferring liquids and dispose of as solid waste.
2. Inspect and clean dumpster/compactor areas. Use proper pressure washing techniques.
3. Wash floor mats and garbage cans in mop sink. Not in alleys or sidewalks.

4. Pour wash water into a utility sink, mop sink, or floor drain, not a gutter, storm drain, or parking lot.
5. Use dry clean methods to sorb up spills outside, don't wash material down the storm drain.
